COORDINATION CHEMISTRY REVIEWS VOLUME 140, COMPLETE, MARCH 1995

Contents

Coordination properties of the bioligands creatinine and creatine in various reaction media
M. Mitewa (Sofia, Bulgaria) 1
The solubilities of the alkali metal salts and the precipitation of Cs^+ from aqueous solution
J.C. Fanning (Clemson, SC, USA) 27
Reactivities of carbonyl sulfide (COS), carbon disulfide (CS_2) and carbon dioxide (CO_2) with transition metal complexes
K.K. Pandey (Indore, India) 37
Bonding properties of thiocyanate groups in copper(II) and copper(I) complexes
M. Kabešová, R. Boča, M. Melník, D. Valigura and M. Dunaj-Jurčo (Bratislava, Slovak Republic) 115
Recent developments in the chemistry of early transition metal porphyrin compounds
H. Brand and J. Arnold (Berkeley, CA, USA) 137
Axial coordination of azaferrocene to transition metal macrocyclic complexes: photoactivation of the macrocycle
J. Zakrzewski (Łodz, Poland) and C. Giannotti (Gif-sur-Yvette, France) 169
Catalytic asymmetric oxidations using optically active (salen)manganese(III) complexes as catalysts
T. Katsuki (Fukuoka, Japan) 189
